## Q3 2017

### TokenLab v1.0

TokenLab is an advanced tool for making and managing crypto tokens on the Expanse network. Users will be able to create tokens, manage their token, add remove features, raise funds, and more.

#### Goals

- Write marketing plan
- Landing page
- Explainer video
- Wireframe for gui
- Smart contracts
- MVP
- LAB Pre-sale
- LAB Post-sale
- Tokenlab release
- Start ERC2.0 token creation

### Gander v2.0

Gander.tech is the official Expanse block explorer. Version 1 was released and is up and running. Version 2 will incorporate a fresh new modern design.

#### Goals

- GUI redesign
- GUI implementation
- Release to public

# Q4 2017

## Borderless Charity Initiatives.

### Lucrui v1.0

Lucrui is a modular crypto token that focuses on bottom up economics. The token will feature multiple ways to mint new tokens, like token swapping, proof of stake, and a universal basic income. Amity and Lucrui will work together. Amity is kind of like a scoreboard for philanthropic behaviour. The higher your amity score, the more lucrui you'll get to mint in all of the issuance modules.

#### Goals

- Landing page
- Explainer video
- Wireframe for gui
- Smart contracts
- Launch Balances contract
- Launch StandardToken Issuance module
- Launch token swap contracts

### Amity Social Network v1.0

Earn rewards for working together to help others. Amity is a social rewards platform that rewards you for your humanitarian effort. Humanitarians will earn Amity points and climb the leaderboards every time they donate to charity, get their friends to join, and launch successful campaigns.

#### Goals

- Finish White Paper
- Write marketing plan
- Landing page
- Explainer video
- Wireframe for gui
- Smart contracts
- MVP on Android and iPhone
  - Donations
  - Leaderboard

# Q1 2018

## EXP.LIFE v1.0

EXP.LIFE is a gamification platform, where users can have fun while earning life experience. Users will be able to create and complete user generated content, climb leaderboards, and experience new things!

### Goals

- Hire developers to work on EXP.LIFE exclusively.
- Finish White Paper
- Write marketing plan
- Launch Landing page
- Explainer video
  - Write script
  - Get animated
  - Release video
- Wireframe for gui
- Smart contracts

## Borderless.tech v2.0

Borderless.tech is an identity management platform that adds liquidity to human identity. Borderless.tech aims to create a cost effective global ID system that can help emerging markets leap over the last mile into the global markets.

### Goals

- Hire new dev team to focus exclusively on Borderless.tech
- Update whitepaper
- Update website
- Write new contracts
  - Marriage Registry
  - Birth Registry
  - Citizenship Registry
  - Nation Registry
  - Property Registry
  - Escrow Lab

- Nation Lab
  - Registry Lab
- Update GUI wireframe to incorporate new functionality
- Develop new GUI

## Q2 2018

### EXP.DAO v1.0

#### Goals

- Update whitepaper
- Rewrite contracts
  - Division protocol
  - Division Lab
  - Proposal protocol
  - Proposal Lab
  - Voting protocol
  - Voting Lab
- Develop GUI

## Expanse Project Overview

### Projects

### Expanse

- EXP.EBS - a rewards program that rewards participants with exp.
